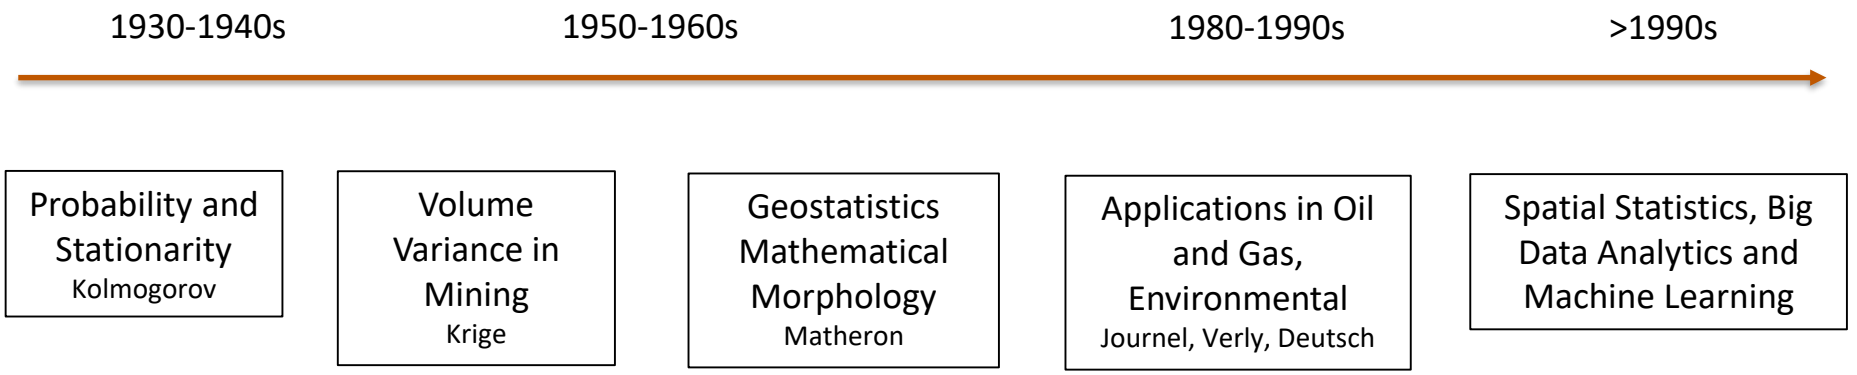
Petroleum / Mining / Spatial Engineering and Science Leadership in the Fourth Paradigm

'We are the original data-driven science, we have been big data long before tech learned about big data!'



'Complicated, heterogeneous, sparsely sampled, vast systems with complicated physics and high value decisions.'

What is a Hackathon?

'an event in which a large number of people meet to engage in collaborative computer programming.'

Dictionary.com

'The goal of a hackathon is to create functioning software or hardware by the end of the event'

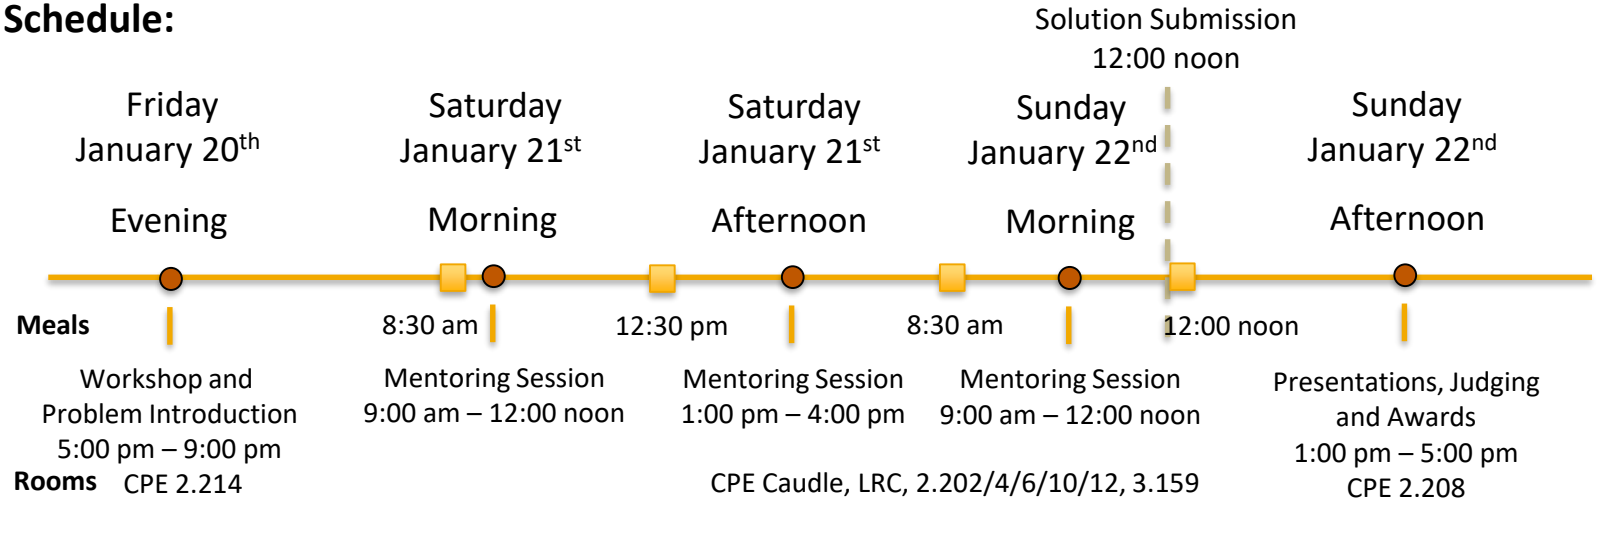
The Plan at 30,000 ft

Apply Data-driven Solutions with Data Analytics and Machine Learning

Schedule:



Enhance Learning

Promote collaboration & data-driven science

Inspire Innovation

Teams:

Register teams of 3-4, which can include students from other departments and schools (UT EID required), but one student must be a UT PGE student and one 1 undergraduate student per team (could be the same student).

Awards:

Winners of the A.I. Hackathon will be awarded bragging rights and $5,000 for first place, $2,500 for second place, $1,000 for third place and $500 for fourth place teams.

The Hackathon Rules

Submit to GitHub by January 22nd:

1. Well-documented Python workflow in a Jupyter Notebook
2. Results as a .cvs DataFrame ESPs (fail in 30 days – 1, otherwise – 0).
3. Short presentation with executive summary, goals workflow choices and defense, results and discussion. Every team member participates in the presentation.

Participation: All team members contribute to the above products. There are various roles! Participate in sessions.

Coding: Use only open source and methods / workflows developed by during the hackathon. Provide code for testing and scoring. All code in Python, Jupyter Notebook. **Readable code!**

The Hackathon Rules

Participate in the Scheduled Workshops and Working Sessions

Treat All other Hackers, Hosts, Mentors, Judges, Coordinators with the utmost respect.

The data has been sanitized. Do not attempt to hack the source!

Cite all code used from other sources in your workflows.

  - **Accuracy** of 40 ESP predictions
  - Score = $proportion\ correct$

Presentation: 20% - and We Must Be Able to Communicate Our Work!

- Executive summary, project goals, workflow description, results and discussion, finish on time

Workflow: 5% - Others Must Understand our Work for Adoption!

- Scoring metrics: readable code, efficient code, documentation of steps

Use the provided templates for results, workflow and presentation. Follow the submission guidelines and submit on time.
