The Hackathon Rules

Submit to GitHub by 12:00 noon, February 1st:

<input type="checkbox"/> Well-documented Python workflow in a Jupyter Notebook. See template in resources folder.	[Team_Name].ipynb
<input type="checkbox"/> Short presentation with executive summary, goals, workflow choices and defense, results and discussion. See template in root.	[Team_Name].pptx
<input type="checkbox"/> Populate solution in this DataFrame saved as a .csv file. See template in root.	solution.csv

Complete 10:00 am, February 1st :

- Team confirmation form, with team name, and members

Participation: All team members contribute to the above products and participate in the presentation. There are various roles!

Coding: Use only open source and methods / workflows developed during the hackathon. Provide code for testing and scoring. All code submitted in Jupyter Notebook. **Readable code!**

The Hackathon Rules

Our academic staff have volunteered to assist over the weekend.

- Please let them know that we appreciate. Please treat them with great respect.
- Let's all do house keeping, clean up and disposal of recycling and waste in your work area and general areas, as we go. Take out the trash. Offer to help the staff!
- Share contacts within your team in case you get locked out. PGE student can open external door if locked.

The Hackathon Rules

Participate in the Scheduled Workshops and Working Sessions

Treat All other Hackers, Hosts, Mentors, Judges, Coordinators with the utmost respect.

Use code from others, but cite all code used from other sources in your workflows and presentations, e.g., figure captions.

The data has been sanitized. Do not attempt to hack the source!

But here's a hint...

The Hackathon Rules

The data has been sanitized. Do not attempt to hack the source!

We can provide the following general location of the data set.

Hackathon Team Scoring

Results: 75% - Results, Results, Results!

- Average of rank transform of accuracy error measure and uncertainty model goodness over all groups.

Presentation: 20% - and We Must Be Able to Communicate Our Work!

- Executive summary, project goals, workflow description, results and discussion, **novel data analytics, and data and model viz**, finish on time

Workflow: 5% - Others Must Understand our Work for Adoption!

- Scoring metrics: readable code, efficient code, documentation of steps

Use the provided templates for results, workflow and presentation. Follow the submission guidelines and submit on time.
